

# Plant Crib

---

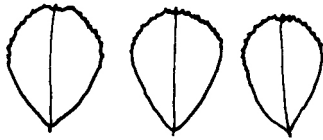

## ***MEDICAGO LUPULINA* / *TRIFOLIUM DUBIUM***

Vegetatively, these two species can be distinguished as follows:

***Medicago lupulina*** L.: Usually densely hairy, with leaflets which are toothed on the margins and entire to emarginate at the apex but with a small distinct point in the middle; stipule often with small, obtuse teeth.

***Trifolium dubium*** Sibth.: Sparsely hairy to glabrous and has leaflets which are toothed on the margins and entire to emarginate at the apex; stipule entire.

***Medicago lupulina***

***Trifolium dubium***
